However, high initial investment hampers market growth. On the contrary, increased adoption of supervisory control and data acquisition and advancements in Industrial IoT (IIoT) is expected to create lucrative opportunities in the industry.

Based on enterprise size, the small and medium enterprises segment is expected to register the fastest CAGR of 11.8% during the forecast period. The proliferation of lean manufacturing among SMEs to eliminate almost all waste from production processes is a major factor that drives the growth of the segment.

However, the large enterprises segment dominated the global manufacturing operations management software market in 2018, accounting for four-fifths of the market. Large industries have gained high traction of manufacturing operations management software to have consistent

manufacturing operations across all its locations, which drives the growth of the segment.

Based on components, the software segment held the largest share in 2018, contributing to nearly three-fourths of the global manufacturing operations management software market.

The emergence of digitalization in manufacturing production areas to optimize production performance and improve flexibility, efficiency, and time-to-market drive the growth of this segment. On the other hand, the services segment is expected to register the fastest CAGR of 11.8% during the forecast period.

The global manufacturing operations management software market across the North America region held the largest share in 2018, accounting for nearly two-fifths of the market. The region is expected to maintain its dominance throughout the forecast period. The emergence of extensive technological advancements in manufacturing and increase in global competitiveness among manufacturers.

On the other hand, the market across the Asia-Pacific region is anticipated to register the fastest CAGR of 11.8% during the forecast period, owing to the rise in demand for technology-based services and growth in a number of manufacturing facilities.

Major market players:

- Aegis Industrial Software Corporation
- Aspen Technology, Inc.
- Critical Manufacturing
- Honeywell International, Inc.
- Plex Systems
- Siemens AG
- ABB Ltd.
- Critical Manufacturing
- Dassault Systems SE
- Emerson Electric Co.

Key Benefits for Stakeholders:

- This study includes the manufacturing operations management software market trends,

opportunity, analysis, and future estimations to determine the imminent investment pockets.

- The report presents information related to key drivers, restraints, and opportunities of the manufacturing operations management software industry.
- The manufacturing operations management software market share is quantitatively analyzed from 2018 to 2026 to highlight the financial competency of the industry.
- Porter's five forces analysis illustrates the potency of the buyers & suppliers in the MOM software market.

Thanks for reading this article; you can also get individual chapter-wise sections or region-wise report versions like North America, Europe, or Asia.

If you have any special requirements, please let us know and we will offer you the report as per your requirements.

Lastly, this report provides market intelligence most comprehensively. The report structure has been kept such that it offers maximum business value. It provides critical insights into the market dynamics and will enable strategic decision-making for the existing market players as well as those willing to enter the market.

About Us:

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP, based in Portland, Oregon. AMR provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients in making strategic business decisions and achieving sustainable growth in their respective market domains.

AMR launched its user-based online library of reports and company profiles, Avenue. An e-access library is accessible from any device, anywhere, and at any time for entrepreneurs, stakeholders, researchers, and students at universities. With reports on more than 60,000 niche markets with data comprising of 600,000 pages along with company profiles on more than 12,000 firms, Avenue offers access to the entire repository of information through subscriptions. A hassle-free solution to clients' requirements is complemented with analyst support and customization requests.
