“Platinum jewelry continues to play a leading role on the red carpet, including at major awards shows and movie premieres,” said [Platinum Guild International](#) CEO Huw Daniel. “The metal is known for its durability, so it holds diamonds and gemstones of all sizes most securely, which is especially important in one-of-a-kind jewelry designs.”

About Platinum Jewelry

Platinum is the ideal choice for red carpet jewelry because it holds diamonds and precious gemstones more securely than any other metal. It is not only the highest quality metal, but its density makes it one of the most durable and enduring precious metals. Platinum is also naturally white, unlike white gold, which means it will not cast any tint onto a diamond or gemstone, allowing the stone's genuine color to sparkle brightly.
