

Alzheimer's Disease Market Research Report 2022-2032: Size, Growth Analysis, and Forecast

BROOKLYN, NEW YORK, USA, February 27, 2023 /EINPresswire.com/ --

According to the latest report by IMARC Group, titled "[Alzheimer's Disease Market: Epidemiology, Industry Trends, Share, Size, Growth, Opportunity and Forecast 2022-2032](#)," offers a comprehensive analysis of the industry, which comprises insights on the alzheimer's disease market.

Alzheimer's Disease Market

Alzheimer's Disease treatment represents therapies and drugs that are used to treat a neurodegenerative disease characterized by the degeneration of nerve cells in numerous areas of the brain that control memory, thought, and language. They can be categorized into several types, including cholinesterase inhibitors, combination drugs, pipeline drugs, N-methyl-D-aspartate receptor (NMDA) antagonists, etc. These Alzheimer's disease drugs and therapies help to maintain mental function, manage behavioral symptoms, and delay or slow the progression of the disease. Consequently, they are in extensive demand across the globe.

Time Period of the Study:

- Base Year: 2021
- Historical Period: 2017-2021
- Market Forecast: 2022-2032

Alzheimer's Disease Market Growth Factors:

The growing geriatric population across countries, who are more prone to neurodegenerative

disorders, is primarily driving the Alzheimer's disease market. In addition to this, the increasing diagnosis and drug treatment rates and the escalating adoption of newer diagnostic techniques for early diagnosis are also positively influencing the market growth. Moreover, the rising investments by government bodies, especially in developing countries, to ensure healthcare infrastructural improvements and the introduction of multiple initiatives by public and private organizations aimed at spreading awareness about the ailment and the need for timely treatments are acting as significant growth-inducing factors. In line with this, the inflating expenditure by leading market players in research and development (R&D) activities to launch new drugs that target beta-amyloid and tau proteins in the brain, which are mainly responsible for the disease, and lower the buildup of amyloid plaques for slowing down cognitive decline in the early-stage are further stimulating the market. Besides this, the shifting preferences toward various non-pharmacological interventions for the disease, which include cognitive training, proper diet, physical exercise, etc., are expected to bolster the Alzheimer's disease market over the forecasted period.

Key Market Segmentation:

Alzheimer's Disease - In-Market and Pipeline Drugs:

- In-Market Alzheimer's Disease Drugs
 - o Drug Overview
 - o Mechanism of Action
 - o Regulatory Status
 - o Clinical Trial Results
 - o Drug Uptake and Market Performance

- Late-Stage Pipeline Alzheimer's Disease Drugs
 - o Drug Overview
 - o Mechanism of Action
 - o Regulatory Status
 - o Clinical Trial Results
 - o Regulatory Status

Countries Covered:

- United States
- Germany
- France
- United Kingdom
- Italy
- Spain

- Japan

Epidemiology Insights:

- What is the size of the Alzheimer's Disease patient pool (2017-2021) across the seven major markets?
- What would be the forecasted patient pool (2022-2032) of Alzheimer's Disease across the seven major markets?
- What are the key factors driving the epidemiological trend of Alzheimer's Disease?
- What will be the growth rate of Alzheimer's Disease patients across the seven major markets?
