

DCMS Network is Now Offering As Built, BIM Services, and 3D Scanning in Los Angeles

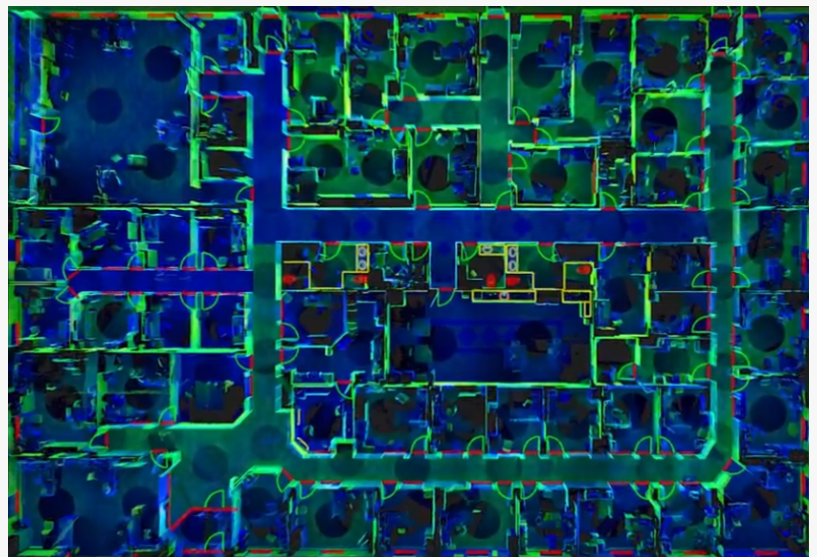

As Built Services for any Construction Project in Los Angeles

UNITED STATES , February 27, 2023
/EINPresswire.com/ -- Los Angeles, CA –
Today, DCMS Network is proud to announce that it's now offering As Built, BIM, and [3D Scanning Services](#) in Los Angeles. This comprehensive suite of services can help businesses create detailed models of spaces and provide accurate data on distances between points with unprecedented accuracy. These services also allows companies to plan out warehouse/office upgrades quickly without unexpected delays due to inaccurate measurements.

The team at DCMS Network has been providing these services for many years and has built an impressive reputation as a top provider in the industry. The company was recently featured on a podcast by Matterport, one of the leading providers of 3D Equipment. DCMS Network's As-Built Drawings from Point Cloud Data services uses laser scanning technology to collect raw point cloud data and generates extremely accurate measurements that are not otherwise possible with traditional surveying techniques. In Addition, the company offers As-Built 2D Building Elevations from Point Cloud Data which can

measure distance between two or more points on a scale not achievable through conventional methods such as tape measures or traditional surveyors.

DCMS Network's Industrial Warehouse & Office Build Out for Retrofit services enables clients to take advantage of precise 3D modeling services which provides assistance with planning retrofits accurately so work can be completed quickly without unexpected delays due to inaccurate measurements. The company also provides Retail Space Management and Planning which captures precise measurements from retail spaces so clients can maximize potential profits by minimizing wasted space due to miscalculations based on conventional methods.

In conclusion, DCMS is proud to offer its cutting edge technology tools and specialized expertise to clients in Los Angeles. The company strives to provide the most innovative solutions using advanced technology and state-of-the-art systems. The team's comprehensive knowledge of the industry and years of experience allow the company to develop custom solutions that are tailored to meet the exact specifications of future and existing clients.
