In recent years, there had been considerable development in the field of procedure trays. The growing surgical procedures have increased the demand for surgical instruments. Procedure

trays offer benefits such as performing surgical procedures like hip, hand, and pacemaker surgeries with ease and accuracy. An enormous amount of time can be saved, during the surgical procedure and in the preparations for an operation. Gaining time means that it is possible to work more efficiently and thus to optimize the planning of operations. Operation theatre logistics are simplified. There is a reduction in the number of activities required to get the right products to the right place on time. The fact that custom procedure trays are supplied just in time means that the hospital can simplify its logistics and control its costs. The benefits offered by custom procedure trays is anticipated to increase the demand for procedure trays in the forecast period.

Based on the product type, global procedure trays market was segmented into angiography, ophthalmology, operating room, and anesthesia room. Operating room market segment led the market for procedure trays market in 2018, contributing a market share of 50.7% owing to the rising prevalence of the diseases and increasing number of surgeries. Also, the operating room segment is anticipated to witness the fastest growth rate of 7.3% during the forecast period, 2019 to 2027.

The report segments the global procedure trays market as follows:

Global Procedure Trays Market – By Product Type

Angiography

Ophthalmology

Operating Room

Anesthesia Room

Global Procedure Trays Market – By End User

Hospitals

Ambulatory Surgical Centres

Clinics
