Chronic disease management (CDM) refers to the ongoing care and treatment of chronic diseases, which are long-term medical conditions that require ongoing management and attention. Chronic diseases can include conditions such as diabetes, heart disease, hypertension, asthma, arthritis, and chronic kidney disease.

CDM involves a coordinated approach to care that includes prevention, early detection, and ongoing monitoring of chronic diseases. It focuses on maintaining the patient's health and

quality of life by preventing complications and managing symptoms. The aim is to help patients manage their chronic conditions effectively, reduce the impact of symptoms on their daily lives, and avoid or delay complications that can arise from uncontrolled chronic disease.
