

Industrial Food and Beverages Filtration System Market at a CAGR of 5.6% to 2031

Increase in demand for industrial food and beverages filtration systems, owing to the growing emphasis on preventing food contamination.

PORTLAND, OR, UNITED STATES, March 1, 2023 /EINPresswire.com/ -- The [industrial food and beverages filtration system market](#) size was valued at \$1.1 billion in 2021, and is estimated to reach \$1.9 billion by 2031, growing at a CAGR of 5.6% from 2022 to 2031.

Industrial filters for food and beverages safely and affordably eliminate contaminants, prolonging shelf life of consumables. These filters help to regulate odors, ambient temperatures, and humidity during the manufacturing process as well as to reduce contamination of consumable items that is transmitted by air and water. Filters also assist in maintaining continuous airflow throughout the process and catch even the smallest particles, which is expected to have a significant impact on the industrial food and beverages filtration system market in the future.

Furthermore, to eliminate any potential risks of product contamination at manufacturing facilities, severe controls have only been enforced on the manufacture of foods & beverages. Air filtering is a crucial component of sanitary food and beverage processing systems. Contrarily, airborne germs pose a significant threat to food processors. Food and drink air filters assist in eliminating these dangerous germs, making the food safe to eat.

Manufacturers must be able to rely on contaminant removal technology to produce items that fulfil consumer demands for tastes and quality while successfully lowering the risk of illnesses or pollutants that pose a health concern to the general population. For instance, In January 2020,

The Parker Filtration Innovation Center, a brand-new research and development center for filter membrane applications, which is being built near Columbia, Tennessee by Parker-Hannifin Corporation. The firm will be able to perform extensive research to enhance filtering systems in the food and beverage sector as a result of this expansion in capacity.

Top Players:

The key players that operating in theÂ industrial food and beverages filtration system industry are 3M Co., Alfa Laval AB, American Air Filter Co. Inc., Critical Process filtration inc., Eaton Corporation plc, Filter Concept Pvt. Ltd., GEA Group AG, Graver Technologies LLC, KRONES AG, Parker Hannifin Corp., Pall Corporation, Mott Corporation, Aqseptence Group, Universal Filtration, and Donaldson Company, Inc.

Key Segments:

By Products Types -

- Dust collector
- Cartridge collector
- Baghouse filter
- Basket centrifuges
- Others

By Application -

- Dairy
- Beverages
- Food and ingredients
- Others
