

Google, IBM, Other Top Enterprise and Government Officials Added to Speaking Roster for Commercialising Quantum US

SF Bay Area/Silicon Valley region selected for first US quantum conference by The Economist

SAN FRANCISCO, CALIFORNIA, UNITED STATES, March 1, 2023

[/EINPresswire.com/](https://www.einpresswire.com/) -- A powerful lineup of 80+ experts and decision-makers, from Google and IBM to Canada's Minister of Innovation, are now lined up to speak at the

Economist's first quantum conference

in the U.S., Commercialising Quantum US, on March 23 in San Francisco and March 24 virtually.

New speaker additions include some of the biggest names in quantum, enterprise, government, and venture capital. This broad cohort of speakers signals the vast impacts that quantum tech

promises to have across sectors. Speakers represent a range of organizations including Google, IBM, Sandbox AQ, Government of Canada, NATO, T-Mobile, Albertsons, BMW, Ford, Marriott, Airbus Ventures, HSBC and Bank of England.

“

As quantum technology moves closer to solving some of the most difficult problems, it's vital that the quantum ecosystem connects with more commercial enterprises”

Jack Hidary, CEO of SandboxAQ

Jack Hidary CEO of SandboxAQ, who will speak on March 23, noted, "As quantum technology moves closer to solving some of the most difficult problems, it's vital that the quantum ecosystem connects with more commercial enterprises to determine the best way partnerships can create lasting change. I commend the Economist Impact

team for organizing this important conference at the right time and location.”

Commercialising Quantum US: From qubits to profits is focused on building bridges between the quantum tech sector and other industries. Whether it's cybersecurity concerns or economic

benefit, many companies and government agencies are delving into quantum computing's potential benefits and even the issues it could create.

Brian Poppe Chief Data Office of Mutual of Omaha, also a speaker at the conference, noted, "Like any good technological leap, quantum is a double-edged sword – breaking old models, but creating brand new opportunities. And if you think it's too technical or not going to affect your industry, you're wrong. It's going to hit you faster than you think."

With the conference now less than a month away, interested sponsors, participants, and the press are encouraged to register now. For a limited time, complimentary passes are available for quantum end-users in leadership roles from enterprise, corporations, government, and academia.

Speaking roles are reviewed on a case-by-case basis, if interested, please contact Helen Ponsford at helenponsford@economist.com.

About Economist Impact

Economist Impact combines the rigour of a think-tank with the creativity of a media brand to engage a globally influential audience. We believe that evidence-based insights can open debate, broaden perspectives and catalyse progress. The services offered by Economist Impact previously existed within The Economist Group as separate entities, including EIU Thought Leadership, EIU Public Policy, Economist Events, EI Studios and SignalNoise.

Our track record spans 75 years across 205 countries. Along with creative storytelling, events expertise, design-thinking solutions and market-leading media products, we produce framework design, benchmarking, economic and social impact analysis, forecasting and scenario modelling, making Economist Impact's offering unique in the marketplace. Visit www.economistimpact.com for more information.

About The Economist (www.economist.com)

With a growing global circulation and a reputation for insightful analysis and perspective on every aspect of world events, The Economist is one of the most widely recognised and well-read current affairs publications. The paper covers politics, business, science and technology, and books and arts, concluding each week with the obituary. In addition to the web-only content such as blogs, debates and audio/video programmes available on the website, The Economist is available to download for reading on Android, Blackberry PlayBook, iPhone or iPad devices. The Economist Espresso, our daily briefing smartphone app, is also available for download via iTunes App Store or Google Play.
