Trending Fertility Drugs Market Trend

The companies in the fertility drugs market are focusing on the launch of self- administration

fertility solutions for advanced infertility treatment. The self-administration fertility solution makes it easier and less painful for women to self-administer daily injections. For example, in August 2021, Merck Specialities, the healthcare business of Merck in India, launched Pergoveris Pen for advanced infertility treatment in India. This launch aims to fulfill unmet medical needs by providing an improved, convenient, and ready-to-use combination treatment option for women with a severe follicle-stimulating hormone (FSH) and luteinizing hormone (LH) deficiency. The Pergoveris Pen is a combination of a freeze-dried powder and solvent, reducing the probability of reconstitution errors. As a result, Pergoveris delivers with more precision and, hence, is more accessible to self-administration by patients during infertility treatment.

Fertility Drugs Market Segments
