Attorney and Legal Scholar, Song Bo, Analyzes the 3-Factor Relationship between Human Rights, Political Power, and Authority in Society

BOULDER, COLORADO, UNITED STATES, March 16, 2023 /EINPresswire.com/ -- "Right, Power, and Authority: Analysis on 3-factor Relationship of Human Societies" (ISBN: 9781957144696) is a new book that delves into the intricate relationship between human rights, political power, and authority in the development of societal order. Written by attorney and legal scholar, Song Bo, the book offers unique insights into the effects of these factors on family, organizational, and societal harmony.

The book is divided into three parts. The first section, "Rights," explores the origins and legitimacy of human rights, as well as the irrationality of some rights due to human nature. This sets the stage for the second section, "Power," which discusses the characteristics of power and its impact on society, including the effects of procedural rules, factual truth, and media influence. The section also predicts a return to the normal operation of political power in the age of mobile connectivity.

The third section, "Authority," is divided into two parts. The first part examines the authority of human society, focusing on belief systems and indirect evidence, such as the fact that a significant number of scientists do not oppose, and even embrace, religion. The author then uses hypothesis-based reasoning to describe the intuitive understanding of factors such as soul, faith, and hope, leading to the concept of positive energy as the greatest authority of human society. The second part discusses the order under authority, which follows the logical
