With increasing globalisation, more sports are being played at an international level with countries vying for the winning position, due to which they are proactively maintaining the health of their players with the help of sports medicine. Apart from maintaining health, sports medicine also helps in boosting the performance of players, helping them manage both their training and nutrition together.

Sports medicines are commonly used by players of active sports such as football, baseball, basketball, and soccer. These sports can cause injuries ranging from a simple strain to dislocation of the bone. Rising prevalence of serious injuries is increasing the number of sports and medical centres run by professionals who perform assessment, treatment, diagnostics, surgery, and also provide care after treatment. The growing network of treatment centres is fuelling the overall sports medicine market.

Sports Medicine Industry Definition and Major Segments

Sports medicine is a branch of medicine that is mainly focused on the prevention and treatment of a wide range of injury caused during any sport or physical activity. There are various sub-categories of sports medicine for specific treatments, such as sports dentistry, sports psychology, chiropractic, sports nutrition, sports vision, and sports physiology.
