

Kardex Introduces a new way of picking at Promat 2023

Using a live picking station to project relevant picking information directly onto the surface of the access opening Kardex will display a new way of picking.

WESTBROOK, ME, UNITED STATES, March 6, 2023 /EINPresswire.com/ -- [Kardex](#), a world leading manufacturer of automated storage and retrieval systems (ASRS), is presenting an new and innovative way of picking at [Promat 2023](#). Showcasing its latest developments in natural user interface technology, Promat visitors will experience a new way of picking as part of a live demonstration in Chicago, March 20 – 23 in booth 4325.

This new feature projects relevant picking information directly onto the surface of the access opening.

Visitors will learn how to take their picking experience to the next level at the Kardex booth at this year's Promat. Using a pick station, Kardex will present a new product feature that projects the relevant picking information directly onto the surface of the access opening.

“

We are following the trend of intuitive and user-friendly operation with a visual picking display feature that responds to movements and guides the operator, enabling fast and error-free picking.”

Tobias Flury, Head of Technology

“With this new feature we are following the trend of intuitive and user-friendly operation with a visual picking display feature that responds to movements and guides the operator, thus enabling ergonomic, fast, error-free picking,” says Tobias Flury Head of Technology.

Through the use of digital tools, visitors will experience Kardex's entire portfolio of solutions including vertical lift modules, vertical carousel modules, vertical buffer modules and AutoStore systems come to life using

augmented reality. Comprehensive software packages as well as service and modernization concepts complete the portfolio.

Furthermore, Kardex is a global AutoStore partner. The powerful and space-saving solution for fast and efficient processing of small parts orders fits ideally into the existing solution portfolio of Kardex AG.

About Kardex

Kardex is a leading intralogistics solution provider of automated storage, retrieval and material handling systems. With two entrepreneurially managed divisions, Kardex Remstar and Kardex Mlog, the Kardex mission is to provide solutions and services to increase the efficiency in storing and handling of goods and materials on a global scale.

The two divisions serve as partners over the entire life cycle of a customer's product or solution. From project analysis to realization and service, Kardex helps improve a customer's performance every step of the way. With three own production plants in Germany and one in North America Kardex ensures high quality solutions. To maintain and strengthen its competitive position within technological innovation and outstanding customer loyalty, Kardex is investing in research and development, its supply chain, the expansion of its service organization as well as in new technology via acquisitions. Kardex actively partners with global leaders who share the same values and complement the Kardex solutions including AutoStore, Rocket Solution, Intertex and Sumobox.

Kardex employs 2,000 team members across 30 countries and has installed over 140,000 industry-specific solutions worldwide.
