ABOUT

Jarvis Charles, better known by his stage name Complex Theory, is a hip-hop artist and producer hailing from Chicago. During the day, he works as a software engineer and app developer, but when he's not coding, he channels his raw emotions and poetic lyrics into his precisely crafted tracks. His experience in app development has allowed him to refine his creative process, resulting in self-produced and written songs.

While he's been the primary driving force behind his music, his engineer has served as his executive producer. Despite working with other artists, most within his circle haven't been as dedicated due to the financial struggles associated with pursuing music. Despite these obstacles, Complex Theory has released an impressive five albums in the past five years, with many songs being self-produced.
