St. Jude Children's Research Hospital, opened by Danny Thomas in 1962, now has the world's best survival rates on the toughest cases of childhood cancer. Since its beginning when the survival rate for children with cancer was about 20%, St. Jude Children's Research Hospital has helped to improve that number to 80% today.

St. Jude treats children from all 50 U.S. states and countries around the world. Beyond treating the most difficult cases, St. Jude conducts more clinical trials than any other children's hospital and turns laboratory discoveries into lifesaving treatments that benefit patients every day. By freely sharing their knowledge base and discoveries,

doctors and scientists worldwide can use the information to save thousands more children.

“It gives me, and all of our [Pacific Air Cargo Team](#) Members, great pride to support worthy causes

throughout Hawaii through the caring and charitable activities of PAC Gives Back,” stated Tanja Janfruechte, Pacific Air Cargo CEO. “The work of St Jude Children’s Research Hospital is one that particularly touches all our hearts.”

Families whose child is receiving care at St. Jude Children’s Research Hospital, or its affiliates never receive a bill for treatment, travel, housing or food — enabling them to focus on helping their child to survive. This and other fundraising efforts help them to be able to do so. St. Jude’s vision for the future is to expand its ability to admit 20% more children, focus on other diseases like sickle cell anemia and other blood disorders and to unlock the mysteries of cancer.

“Pacific Air Cargo is delighted to again support this very worthy cause, raising vital funds to support keiki and their Ohana right here in Hawaii,” said Paul Skellon, Pacific Air Cargo Director of Marketing.
