farmers of Latvia for cultivation of medicinal and aromatic plants. The key feature of Rupus Global Herbal & Research & Development Institute will be to its endeavor for the attainment of higher objectives in the field of medicinal plants research is the establishment of the Centre for Medicinal Plants Research.

Announcing the initiatives, Prof. Dr. Kannan Vishwanath, founder chairman of Rupus Global Limited said “The Baltic state of Latvia, a EU member is a country on the south-eastern coast of the Baltic Sea between Lithuania and

Estonia. According to World Economics Research, the population of Latvia is estimated to be 1,8 million with a GDP per capita using purchasing power parity of US\$41,474. Rupus Global Herbal & Research & Development Institute will be fundamentally executing Clinical Research, Fundamental Research, Pharmacology Research (Pre-clinical Safety/Toxicity and Biological

Activity Studies), Medicinal Plant Research (Medico-Ethno Botanical survey, Cultivation, Pharmacognosy) Drug standardization Research. It is estimated that 122 drugs from 94 plant species have been discovered based on ethnobotanical leads. The local people in the territory of Latvia used medicinal plants to treat different ailments.

The knowledge about the chemical composition of plants might not be known to the local people, but they knew medicinal plants that were useful to treat many kinds of diseases and health conditions. According to information provided in the records of Latvian folk medicine, oral administration of herbals was the most commonly used, simplest and fastest route of administration. Many records mentioned that plant leaves, such as plantain, yarrow, aloe and apple tree leaves were applied directly to fresh wounds or insect or animal bites, as they had properties that reduced inflammation and healed wounds. During Latvia's tenure, its ministry of agriculture has been focusing on the promotion of organic farming, which accounts for 11% of agriculture in the country. Latvia ranks among five EU member states with the highest ratio of organic agriculture against the total area of agricultural land in the country".

Rupus Global Herbal & Research & Development Institute will be set up in a phased manner. We are in the process of identifying the land & building of the proposed institute with the support from the authorities, to promote herbal medicine among the people, Cultivation of prioritized medicinal plants on farmers land & establishment of nurseries with backward linkages for raising and supply of quality planting material. The venture will be built on a public-private partnership. Gradually, we have plans to set up herbal educational institute, showcase Latvia's rich farming heritage. Rupus Global Herbal & Research & Development Institute's objective will be to promote better health through evidence based Ayurveda principles and practices , to
