

Non-Profit Guardian Revival Creates Record Label for Veterans & First Responders

Guardian Encore provides therapeutic opportunities for veterans & first responders to record & release their original music on Guardian Revival Records

BEACON, NEW YORK, USA, March 8, 2023 /EINPresswire.com/ -- [Guardian Revival](#) is a non-profit organization focused on the mental health & well-being of veterans & first responders. Our music program, [Encore](#), provides opportunities for guardians to learn, write, play, record, and share music — casually with their local community and formally with our newly created music label, Guardian Revival Records.

Nonprofit Guardian Revival launches their new record label

Guardians interested in sharing their music with a broader audience collaborate with the Encore team (including a board-certified music therapist) to receive guidance through refining their songs, directing musicians in the recording studio, and managing post-production alongside industry professionals to realize their creative vision.

“

Until recently, I had no original recordings as a solo artist. Guardian Revival has given me the opportunity to record my music and continues to help me on my journey.”

Colton Cori

Guardian Revival Records is available on all major streaming platforms, including [Spotify](#), Apple Music, and Amazon Music.

Over 70 years of focused, evidence-based studies and research have illustrated music's impact on mental health. Through music, Guardian Encore empowers veterans,

active duty military, and first responders and enables them to pursue their creative goals by providing free opportunities to make music together.

Guardian Encore's Tracks program focuses on the recording process by supplying guardians with access to a studio and industry professionals so they can make their music public. The program provides:

- Guidance and professional advice to assist with the songwriting & recording process
- Professional backing bands to learn and perform their original music
- Collaboration with engineers, producers, and artists to create a quality product
- An opportunity to learn and master new skills and foster meaningful relationships
- A path to purpose and positive thinking by working towards a creative goal
