Definition:

Biodegradable Pads, also known as a sanitary pad or menstrual pad is a thin or thick pad made up of super absorbent material that absorbs menstrual fluid during the menstruation period. These pads do not have synthetic or chemical-based raw materials and are eco-friendly in nature. According to the National Family Health Survey of 2015-16, about 58% of women aged between 15 to 24 years use locally prepared napkins, sanitary napkins, and tampons. This growing use of sanitary products is expected to drive the demand for biodegradable pads due to their natural and cost-effective properties.
