#### Definition:

The Machine Learning as a Service (MLaaS) market refers to the provision of cloud-based platforms or services that enable organizations to leverage machine learning capabilities without the need for in-house expertise, infrastructure, or data storage. MLaaS providers offer a range of services, including tools for data preprocessing, model training and evaluation, deployment, and maintenance. The market also includes providers of pre-built machine learning models, APIs, and software development kits (SDKs) that enable developers to build intelligent applications and automate business processes. MLaaS can help organizations of all sizes to reduce the cost and complexity of adopting machine learning and accelerate their time-to-market for AI-powered solutions.

#### Market Trends:

Growing Adoption of Machine Learning Services in Healthcare and Research Oriented Marketing Campaigns and Customer-centric Communication

#### Market Drivers:

Lack of Technical Expertise to Deploy Machine Learning Services

#### Market Opportunities:

Increasing Data Volume and Growing IoT Application and Consistent Retraining of Algorithms

The titled segments and sub-section of the market are illuminated below:

The Study Explore the Product Types of Machine Learning as a Service Market:

Key Applications/end-users of Machine Learning as a Service Market: Network Analytics and Automated Traffic Management, Augmented Reality, Predictive Maintenance, Fraud Detection and Risk Analytics, Marketing and Advertising, Others

With this report you will learn:

- Who the leading players are in Machine Learning as a Service Market?
- What you should look for in a Machine Learning as a Service
- What trends are driving the Market
- About the changing market behaviour over time with strategic view point to examine

competition

Also included in the study are profiles of 15 Machine Learning as a Service vendors, pricing charts, financial outlook, swot analysis, products specification & comparisons matrix with recommended steps for evaluating and determining latest product/service offering.

List of players profiled in this report: Google [United States], IBM Corporation [United States], Microsoft Corporation [United States], Amazon Web Services [United States], BigML [United States], FICO [United States], Yottamine Analytics [United States], Ersatz Labs [United States], Predictron Labs [United Kingdom], H2O.ai [United States], AT&T [United States], Sift Science [United States]

Who should get most benefit from this report insights?

- Anyone who are directly or indirectly involved in value chain cycle of this industry and needs to be up to speed on the key players and major trends in the market for Machine Learning as a Service
- Marketers and agencies doing their due diligence in selecting a Machine Learning as a Service for large and enterprise level organizations
- Analysts and vendors looking for current intelligence about this dynamic marketplace.
- Competition who would like to benchmark and correlate themselves with market position and standings in current scenario.
