becomes unattainable or impractical. The pursuit of excellence will always be the better option when compared to settling for mediocrity," Selimi states. "I wrote the book because I know one essential thing in life is achieving growth and fulfillment and living a life you deserve and love - not just winning and succeeding but also achieving excellence in what you do. Your life can be more by healing your body-mind, developing a growth mindset, and learning how to use your emotional and analytical faculties intelligently. I want to give them (readers) a road map to win the inevitable and ever-evolving life challenges and the battles they'll encounter on their journey to grow into their fullest potential. You can build the confidence and certainty to successfully

liberate yourself from the emotional baggage and distress by fully completing the eight-step Octagon of Excellence method and developing a new way of thinking and being that will transcend your mind and elevate your living, igniting a revolution in thinking to better our modern world.
