

Unlocking Growth: The United States Commercial Drones Market Soars to New Heights

U.S. Commercial Drones Market by Type, by Application and by Function: Opportunity Analysis and Industry Forecast, 2021-2030

PORTLAND, OR, UNITED STATES, March 14, 2023 /EINPresswire.com/ -- [121 Pages Report] Advancements in technological and surge in demand for location-based services fuel the [U.S. commercial drones market](#) size. Based on application, the government segment held the highest share in 2020, and is projected to continue its

dominant share during the forecast period. Production activities of commercial drones were stopped due to lockdown measures across the U.S. Moreover, supply chain disruptions and raw material shortages presented challenges in manufacturing activities.

According to the report published by Allied Market Research, the U.S. commercial drones market generated \$899.6 million in 2020, and is expected to reach \$3.75 billion by 2030, witnessing a CAGR of 15.8% from 2021 to 2030. The report offers a detailed analysis of changing market trends, top segments, key investment pockets, value chain, regional landscape, and competitive scenario.

Covid-19 Scenario:

Manufacturing activities of commercial drones halted due to lockdown measures implemented across the U.S. Moreover, disruptions in the supply chain and shortage of raw materials presented challenges in carrying out manufacturing with full capacity. Ban on import-export activities also added to challenges.

However, the use of drones for surveillance raised a debate regarding privacy and individual rights on mainstream media as well as social media platforms as these drones were utilized for tracking and monitoring the spread in containment zones.

The report offers detailed segmentation of the U.S. commercial drones market based on type, application, and function.
