Safeway Moving is a South Florida-based long-distance moving broker and carrier hybrid which is the brainchild of two visionaries, Rad Gorelik and Boris Svirsky. They founded Safeway Moving in 2020 and grew it massively over the years.

Safeway Moving is celebrating its success of achieving amazing milestones in merely 14 months of operations. Safeway was founded by two schoolmates, Rad Gorelik, and Boris Svirsky. They attended the same high school in New York City and after graduation both moved on to follow their paths. Boris belonged to a family who already had a name in the highly competitive moving industry. Boris joined as an operations manager and lead foreman. He also worked as a driver too. Radmir headed on to join the army but soon re-entered civilian life as a data scientist and algorithm developer in the tech industry.

In 2020, two friends came together to start a moving business that they thought was sure to succeed. They had the vision to revolutionize a stagnant and change-resistant moving industry. Radmir brought his corporate, military, and technological experience while Boris brought his 19 years of experience in the moving industry to the table. They created a long-distance moving company, Safeway Moving with headquarters in Miami, Florida, that was equipped to better serve consumers and set a benchmark of excellence.

The goal that Boris and Radmir had in mind has now been accomplished after just 14 months. With a national network of carriers and affiliates, Safeway Moving is a successful business that consistently receives positive feedback from its clients and critics of the moving industry on a variety of online review sites. They are the fastest-growing company that has expanded its fleet from a single car to 8 tractors, 15 trailers, 10 straight trucks, and offices in 5 major states across the US.

Every client encounter and policy choice made by Boris and Radmir is guided by the company's core values of honesty, decency, openness, and compassion. They have been able to achieve all this because they have invested in their employees by offering them extensive training in cutting-edge methods to boost productivity and provide assistance when coping with the unexpected.
