China Precision Medicine Market-By PMI

Shifting the significance in medicine from reaction to prevention is the major factor driving the growth of the China precision medicine market. Also, increasing government initiatives for the incorporation of precision medicine in China is boosting the growth of the target market. Increasing cases of breast cancer in Chinese's women are also expected to drive the growth of the target market over the forecast period. According to data published by Science Translational Medicine Journal in 2016, it is estimated that 268,600 new breast cancer cases were diagnosed in Chinese women in 2015.

Key Highlights:

- In November 2019, Thermo Fisher Scientific has launched its Ion Torrent Genexus System, the first fully integrated, next-generation sequencing (NGS) platform featuring an automated specimen-to-report workflow that sends results economically in a single day. The company also introduced its Oncomine Precision Assay, an innovative pan-cancer panel for the Genexus platform. It offers comprehensive genomic profiling from formalin-fixed,

paraffin-embedded (FFPE) tissue and liquid biopsy samples with a single assay.
