India Plant-Based Meat Market by IMARC Group

Plant-based meat is prepared from plant-based ingredients, such as soy, wheat, and pea proteins. It is becoming increasingly popular due to its similarities in taste and texture to real meat. It is used to cook burgers, sausages, and deli slices and is often a healthier and more sustainable alternative to animal-based meat, as it has lower levels of saturated fat and cholesterol and is typically free from antibiotics and hormones. It is known to be an excellent source of vitamins and minerals, protein, and dietary fiber. The demand for plant-based meat is growing across India due to the advent of home delivery models and increasing awareness among individuals. country.

India Plant-Based Meat Market Demand:

The emerging trend of veganism majorly drives the market in India. Along with this, the shifting consumer inclination toward healthier alternatives to traditional meat products, due to health consciousness is acting as a growth-inducing factor. With the rising prevalence of chronic conditions, such as cardiovascular diseases, obesity, and cancer among the masses, is creating a positive market outlook. Furthermore, continuous technological advancements in the production process to offer more realistic textures and flavors are catalyzing the market. Some of the other

factors driving the market include rapid urbanization and the easy availability of plant-based meat products through both online and offline distribution channels.
