Biomarker and Companion Diagnostics Conference - East Coast Edition

The conference will kick off with a keynote address from a renowned expert in the field, followed by a panel discussion on the current landscape and prospects of biomarker and companion diagnostics. The first day of the conference will focus on the latest advancements and applications of biomarkers, including precision medicine, oncology, infectious diseases, cardiovascular diseases, and neurodegenerative diseases. Attendees will also get to hear case studies and real-world examples from leading companies and academic institutions.

The second day of the conference will delve into companion diagnostics, covering topics such as regulatory frameworks, reimbursement policies, development strategies, and commercialization. Speakers will also discuss the integration of companion diagnostics with drug development and clinical trials, as well as the challenges and opportunities in this area.

Other highlights of the conference include networking breaks, interactive Q&A sessions, and an exhibition area showcasing the latest technologies, products, and services in the field of biomarkers and companion diagnostics. Attendees will have ample opportunities to connect with industry experts, researchers, and peers, exchange ideas and explore potential collaborations.
