["Castrate-resistant Prostate Cancer Market"](#) research report which covers

inclusive statistics on prevalent trends, drivers, growth opportunities, and restraints that can change the market dynamics of the global industry. This report offers an in-depth analysis of the market segmentation that includes

products, applications and geographical analysis. Castrate-resistant Prostate Cancer market report delivers a nearby watch on leading competitors with strategic analysis, micro and macro market trends and scenarios, pricing analysis and a complete overview of the industry situations during the forecast period.

Castrate-resistant  
Prostate Cancer

Castrate Resistant Prostate Cancer Market Trends

Castration-resistant prostate cancer (CRPC) is a type of prostate cancer that no longer responds to androgen deprivation therapy (ADT), which is the standard treatment for prostate cancer. ADT works by lowering the levels of testosterone in the body, which fuels the growth of prostate cancer cells. However, in CRPC, the cancer cells can still grow even when the levels of testosterone are low. Castration is a colloquial term for the surgical removal of the testes. Low testosterone levels typically slower the progression of prostate cancer.

□□□□□□□□ □□□□□□: The global castrate-resistant prostate cancer market is estimated to be valued at US\$ 9.5 Bn in 2023, and is expected to exhibit a CAGR of 8.2% over the forecast period (2023-2030).
