Trending Antiemetics And Antinauseants Market Trend

Manufacturers are exploiting nanotechnology in the antiemetics and antinauseants market to deliver therapeutic agents to specifically targeted sites in a controlled manner through Nanomedicine and Nano delivery systems. Nanomedicine is the medical application of nanotechnology which uses nanoparticles to enhance the action of the drug in treatment and nanotechnology is the design, characterization, production, and application of devices, structures, and systems by controlled manipulation of size and shape at the nanometer scale. The antiemetic and antinauseant drug manufacturers are inclining more toward the use of Nanomedicine or Nano drugs to make the drug effective and increase their revenues. For instance, Merck & Co., an American multinational pharmaceutical company manufactured Aprepitant under the brand name Emend. It is the first FDA-approved drug for the prevention of acute chemotherapy-induced nausea and vomiting (CINV) that uses nanotechnology to increase the absorption of the drug more easily and efficiently.

Antiemetics And Antinauseants Market Segments

- By Drug: Dopamine antagonists, NK1 receptor antagonist, Antihistamines (H1 histamine receptor antagonists), Cannabinoids, Benzodiazepines, Anticholinergics, Steroids, 5-HT3 receptor antagonists, Other Drug Types

The antiemetics and antinauseants refer to drugs that are used in the prophylaxis or management of vomiting that results from emetogenic chemotherapy, and for the management of postoperative nausea and vomiting. Antiemetic and antinauseant drugs prevent, control, or treat, nausea and vomiting caused in general or by other medications, frequent motion sickness, infections, stomach flu, or chemotherapy. These drugs reduced the symptoms of nausea or vomiting by blocking signal messages to the part of the brain that controls nausea and vomiting.

Antiemetics And Antinauseants Global Market Report 2023 from TBRC covers the following information:
