Trending Everything as a Service Market Trend

The adoption of artificial intelligence and IoT as a service is a key trend gaining popularity in the everything as a service market. Internet of Things (IoT) services are a collection of end-to-end services that allow businesses to design, develop, deploy, and run IoT solutions, including advisory consulting for IoT planning. The outsourcing of artificial intelligence (AI) is done through a third-party service called artificial intelligence as a service (AIaaS). With AI as a service, people and businesses may experiment with the technology for a variety of uses with a smaller initial

investment and lesser risk. IoT-as-a-Service enables businesses to swiftly harness the full potential of connected devices, adopt cutting-edge technologies, and shorten the time to value. For instance, in May 2021, Google LLC, a US-based technology company, introduced Vertex AI cloud services that are completely managed and are AI-based. This platform solution is intended to assist businesses in expediting the implementation and maintenance of AI models. Vertex AI unifies the Google Cloud services used for machine learning development under a single UI and API. Companies can quickly train and compare models in Vertex AI using AutoML or custom code training, and all of their models are kept in a single model repository. On Vertex AI, these models can now be deployed to the same endpoints.
