

Medical Crutches Market size to grow by USD 590.4 million; Development of smart crutches to be a key trend

The global medical crutches market is expected to reach USD 590.4 million by 2025, growing at a CAGR of 5.3% from 2020 to 2025.

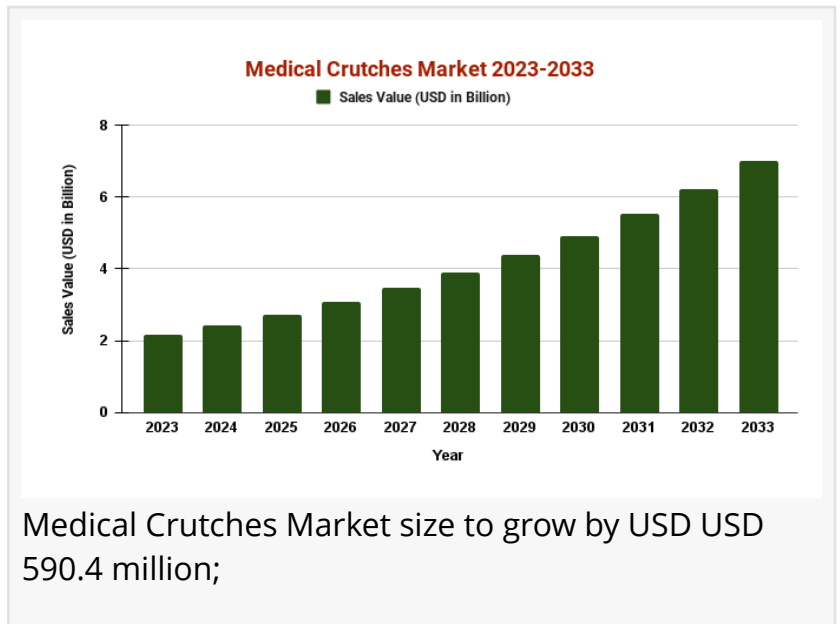

NEW YORK CITY, NEW YORK, UNITED STATES, March 16, 2023
/EINPresswire.com/ -- Market Overview:

The [medical crutches market](#) is a growing market, which is primarily driven by the increasing prevalence of injuries and disabilities, the rising geriatric population, and the growing demand for advanced mobility aids. Medical crutches are commonly used by individuals who have difficulty walking due to an injury or disability. They provide support and stability to the user while walking, helping to reduce the risk of falls and further injuries.

The demand for medical crutches is primarily driven by the increasing prevalence of injuries and disabilities, particularly among the elderly population. Medical crutches provide support and stability to individuals who have difficulty walking, helping them to maintain their independence and mobility. Additionally, the growing demand for advanced mobility aids and the increasing adoption of technologically advanced crutches are also driving market growth.

The largest market for medical crutches is the hospital segment, due to the high number of patients with mobility issues who require support while walking. The homecare segment is the fastest-growing market, as more individuals are choosing to receive medical care in their own homes and are therefore in need of mobility aids like crutches.
