[Trending Web Content Management Market Trend](#)

Technological advancements are emerged as a key trend gaining popularity in the web content management market. Major companies operating in the web content management market are focused on developing new and innovative technologies to sustain their position in the market. For instance, in July 2020, SDL plc, a UK-based intelligent language and content company, launched SDL Tridion, the newest generation of its intelligent content platform. By addressing the whole range of single source information for employees, partners, and customers, greatly boosting automation, and bridging content silos, the platform is intended to help enterprises with their digital transformation. By orchestrating data from diverse content and data silos through a single platform, the user can use SDL Tridion to find the ideal balance between speed and quality. Additionally, because of AI-driven automation, the user can activate enormous volumes of information for audiences around the world, both inside and outside of the business.
