Trending Wearable ECG Monitors Market Trend

Prolonged ambulatory rhythm monitoring is crucial for the diagnosis of intermittent arrhythmia. Conventional technologies for non-invasive rhythm monitoring include Holter monitoring or external cardiac event recorders. However, these traditional technologies have limitations in terms of low sensitivity, low diagnostic yield, and poor patient compliance. Although implantable cardiac monitors (ICMs) help in long-term monitoring, it is an invasive method as it requires

minor surgery and is also associated with significant costs. Therefore, there is an increasing demand for non-invasive ambulatory rhythm monitoring. Smart clothing technology is a novel, alternative tool for non-invasive ambulatory rhythm monitoring.

Wearable ECG Monitors Market Segments

- By Type: Wired, Wireless
- By Application: Atrial fibrillation, Angina, Atherosclerosis, Cardiac dysrhythmia, Congestive heart failures (CHF), Coronary artery disease, Heart attack, Bradycardia, Tachycardia
- By Grade: Consumer, Clinical
- By Sales Channel: Online, Pharmacy
- By Geography: The global wearable ECG monitors market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.
