[Trending Hand Dryers Market Trend](#)

Companies are launching new products to increase their revenue and also for gaining a competitive edge over their competitors. For instance, in February 2022, Initial PLC., a UK-based leading provider of washroom hygiene, introduced the latest innovations to its hand dryer range known as Luna Dry and Luna Mini Dry with three high gloss UV anti-scratch finishes. ION Pure Technology has been used in the engineering of Luna Dry and Luna Mini Dry. The production method incorporates antimicrobial metal ions from the soluble glass solution into the outer case to provide a finish that is resistant to bacteria and germs.

Hand dryers are electronic machines used for drying hands in public bathrooms that work either by pressing a button or automatically using a sensor. Hand dryers are cost-effective, energy-efficient, and eco-friendly devices that are extensively adopted in restaurants, hotels, offices, and malls as a replacement for a towel. These are highly responsive and are equipped with fast-reacting sensors with maximum energy efficiency for instant reaction.
