Trending Ethical Fashion Market Trend

Natural resources are being used as alternatives for complex and adversely affecting chemicals-

based textiles. Chemicals such as chromium which are toxic are heavily used in the leather tanning process. To address the concerns with toxic chemicals, Carmen Hijosa, founder of Ananas Anam, developed 'Pinatex', a natural leather alternative made from cellulose fibres extracted from pineapple leaves as an alternative to it and other petroleum-based textiles. The industrial process used to create Pinatex produces biomass, which can be converted into a fertilizer that farmers can spread into their soil to grow the next pineapple harvest. The use of natural and sustainable materials is current trend in ethical fashion market.

Ethical fashion refers to design, production, and distribution of clothing that prioritises minimising harm to people and the environment. In the best case scenario, it helps all parties involved in the supply chain and improves everyone's future, not just that of the top tier. The social impact and principles underlying a brand's label are important to ethical fashion. It focuses on both the social and environmental impact of fashion, and improving the working conditions of labourers.
