[Trending Cellular Immunotherapy Market Trend](#)

Companies in the cellular immunotherapy market are focusing on developing off-the-shelf

allogeneic therapies for new and improved cancer treatment. Off-the-shelf allogeneic therapies are produced from the cells of donors instead of the patient's cells, as in the case of autologous therapy. Their non-customized nature provides advantages such as cost-effectiveness, large scale, fast production, and quality control. For instance, in May 2022, Novartis AG, a Switzerland-based pharmaceutical company specializing in the discovery, development, manufacturing, and commercialization of drugs, announced that after two or more lines of systemic therapy, the US Food and Drug Administration (FDA) has given expedited approval for Kymriah® (tisagenlecleucel) to treat adult patients with relapsed or refractory (r/r) follicular lymphoma (FL). In addition, Acepodia, a US-based next-generation cell immuno-technology company, will begin a phase 1 clinical trial in August 2020 to evaluate ACE1702, an allogeneic, off-the-shelf NK cell therapy, for the treatment of solid tumors.

Cellular Immunotherapy Market Segments

- By Therapy: Tumor-Infiltrating Lymphocyte (TIL) Therapy, Engineered T Cell Receptor (TCR) Therapy, Chimeric Antigen Receptor (CAR) T Cell Therapy, and Natural Killer (NK) Cell Therapy
- By Primary Indication: B-cell Malignancies, Prostate Cancer, Renal Cell Carcinoma, Liver Cancer, Non-Hodgkin Lymphoma, Other Primary Indications
- By Application: Prostate Cancer, Breast Cancer, Skin Cancer, Ovarian Cancer, Brain Tumour, Lung Cancer, Other Applications
- By Geography: The global cellular immunotherapy market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.
