A complete blood count (CBC), sometimes known as a full blood count (FBC), is a series of medical laboratory tests that give information regarding a person's blood cells. The CBC measures the number of white blood cells, red blood cells, and platelets, as well as hemoglobin concentration and hematocrit. The CBC is done with standard laboratory equipment or an automated hematological analyzer, which counts cells and records their size and structure. Three varieties of CBC devices exist: 3-part analyzer, 5-part analyzer, and 6-part analyzer.
