[Trending Cough And Cold Preparations Market Trend](#)

The cold and cough preparations market is regulated by authorities such as the Food and Drug Administration in the US. For instance, the Food and Drug Administration (FDA) restricted the use of codeine in children. Codeine is approved to treat pain and cough but this medicine carries serious risks, including slowed or difficult breathing, and can be potentially fatal. This risk is greater in children younger than 12 years but the use of codeine should also be limited in some older children. Single-ingredient codeine is FDA-approved only for use in adults. FDA is also recommending against the use of codeine in breastfeeding mothers due to possible harm to their infants.

[Cough And Cold Preparations Market Segments](#)

- By Type: Bronchodilators, Anticholinergic, Pulmonary Antihypertensives
- By Drug Type: Antihistamines, Expectorants, Bronchodilators, Decongestants, Antibiotics, Other Types

The cold and cough preparations refer to the medications that are used to treat cold and cough. The drugs for the treatment of cold and cough act on the receptors to which the virus causing the infection gets attached, by antagonizing the action of the receptors and killing the viral infection, thereby reducing congestion by lysing the mucus and dilating the bronchioles constricted by the mucus deposition.
