The Covid-19 outbreak has had a significant effect on the world. Some sectors thrived during the pandemic while some faced tremendous losses. As per the restrictions and guidelines issued by World Health Organization (WHO), the majority of the manufacturing and production facilities were closed or working at low potential. Moreover, the prolonged lockdown created challenges in the procurement of raw materials. These factors create a huge gap in supply and demand and disrupted the supply chain. However, as the world is recovering from the pandemic, the Internet of Things (IoT) in Banking market is expected to get back on track.
