About Jayce's Journey

Established in 2022, Jayce's Journey Inc. grew out of the vision and due diligence of founder Deidre Price, who's son Jayce was diagnosed with autism at the age of two years old. Jayce is currently non-verbal and communicates through American Sign Language. He has an aide who specializes in the DIR Floortime therapy approach who accompanies him in school and regularly attends speech & occupational therapy. Jayce has recently made tremendous improvements after starting Biomedical treatment which is an evidence-based holistic approach to testing and treating the underlying behavioral and psychological symptoms of Autism.

Jayce's Journey is dedicated to supporting children and individuals with autism and/or developmental delays through early intervention services, education, and access to resources. We envision a future in which equitable opportunities are provided to individuals with autism where we can work as a team to discover their abilities through being empowered to overcome barriers and limitations throughout their various stages of life.
