[Trending Commercial Helicopters Market Trend](#)

Major companies operating in the industry are focusing on introducing technological innovations to maintain their position in the competitive business environment, which is gaining significant popularity in the commercial helicopter market. For instance, Bell, part of Textron, is developing a new technology called electrically distributed anti-torque (EDAT) to decrease the sound problem. The new system ensures enhancements to safety and operating cost, as well as a decrease in sound compared to an aircraft with a conventional tail rotor. The 429, built with EDAT technology, features four fans, electrically driven, in the back of the helicopter instead of the conventional rotor setup. It provides key benefits to the traditional tail rotor.
