Analyst View:

Growing number of COVID-19 patients demanding intensive care

Rapidly increasing confirmed cases of coronavirus disease are directing the healthcare market to prepare for the tasks associated with this pandemic. Hence, COVID-19 affected economies are continuously focusing on expanding their ICU bed ability that will help support the market growth. According to recent news article, patient suffering from coronavirus mainly needs an average treatment of 15 days in intensive care units. Therefore, increasing COVID-19 cases will drive the target market growth in the coming years. Additionally, the demand for new ICU beds in hospitals will also increase in the near future.

Rising demand for ICU beds from the hospitals and ICUs

The hospitals segment was estimated for about US\$ 800 million and is expected to register considerable growth over the forecast period. Increasing growth in the number of hospital admissions and growing ratio of ICU beds to hospital beds are some of the major factors boosting the growth of the global ICU beds market. For instance, as per the recently published report by Centre for Evidence-Based Medicine, in UK, the number of people admitted to hospitals with suffering from coronavirus ranked above 100,000.
