

# IoT in Transportation Market Size to Hit USD 495.57 Billion by 2030 at 19.9% CAGR: Analysis by Trends, Size, Share

*Growth in information, communication, & technology (ICT) fuels the growth of the IoT in transportation market.*

PORTLAND, PORTLAND, OR, UNITED STATE, March 24, 2023

/EINPresswire.com/ -- Reduced cost of powerful sensors & controllers, extended and enhanced internet connectivity, the rise in growth of the information, communication, and technology industry, along with the surge in government initiatives for smart cities are the major factors that drive the growth of the global [IoT in transportation market](#).

However, threats to data security & privacy and poor transport infrastructure in emerging and underdeveloped countries hamper the market growth. On the contrary, the growth of cloud-based transport infrastructure service providers is expected to create lucrative opportunities in the near future.

Download Sample Report at: <https://www.alliedmarketresearch.com/request-sample/2484>

According to the report, the global IoT in the transportation market was pegged at \$135.35 billion in 2016 and is projected to garner \$328.76 billion by 2023, registering a CAGR of 13.7% from 2017 to 2023.

The global IoT in the transportation market is categorized on the basis of type, mode of transport, application, and geography. Based on type, the market is segmented into hardware, software, and services. The hardware segment held the largest share in 2016 and is expected to continue its trends throughout the study period.

However, the software segment is expected to register the fastest CAGR of 14% during the

forecast period, owing to a rise in the adoption of connected & smart technologies in transportation infrastructure and a surge in demand for integrated security & safety systems for enhancing public safety.

Based on the mode of transport, the market is divided into roadways, railways, airways, and maritime. The market is analyzed across various regions including North America, Europe, Asia-Pacific, and LAMEA. The market across North America held the largest share in 2016, owing to advanced technical aspects and high adoption of IoT across various industry verticals.

However, the market across Asia-Pacific region is projected to manifest the fastest CAGR during the forecast period, due to rise in growth of emerging economies such as India and China, and rapid urbanization in the region.

The global IoT in transportation market report includes in-depth analysis of the major market players such as AT&T Inc., Alcatel-Lucent, IBM Corp., Denso Corp., Garmin International Inc., General Electric, Thales Group, Cisco Systems, Inc., Verizon Communications Inc., and TomTom N.V.
