The Foley Catheter Market data reports also provide a 5-year pre-historic forecast (up to 2031) for the sector and include data on socio-economic data of global.

The Foley catheter market is expected to experience substantial growth over the coming years due to an increasing prevalence of urological disorders and demand for minimally invasive surgeries. Foley catheters are flexible tubes inserted through the urethra into the bladder to drain urine. They're commonly used in hospitals, clinics, and home healthcare settings for those unable to urinate on their own or needing bladder drainage due to medical reasons. The aging population and increasing incidence of diseases like urinary incontinence and urinary tract infections are expected to fuel demand for Foley catheters.

Furthermore, technological advances in catheter materials and design are expected to enhance patient comfort and reduce the risk of complications related to catheterization. Nonetheless, potential risks and issues with using Foley catheters such as infection or tissue damage could potentially hamper the market growth.
