

Meet RATH, a Copilot for the AI-Driven Future of Data Science

RATH, a Copilot for Data Science, is set to transform the data analysis landscape by streamlining workflows and delivering personalized guidance.

SAN FRANCISCO, CALIFORNIA, UNITED STATES OF AMERICA, March 24, 2023 /EINPresswire.com/ -- [Kanaries Data](#) – the innovative company on a mission to develop cutting-edge data analysis and visualization tools – is proud to develop [RATH](#), an artificial intelligence-driven exploratory data analysis tool.

Acting as a copilot for any data science professional, RATH is set to transform the data analysis landscape. Its powerful, user-friendly features can streamline workflows, deliver personalized guidance to users, and provide insights that empower both data professionals and their companies to make more informed decisions. Other key features include:

- Automated Exploratory Data Analysis: RATH's Copilot function automates tasks like data cleaning and data transformation, allowing users to concentrate on higher-level tasks.
- An Advanced Augmented Analytics Engine: RATH's Copilot feature uses an AI-powered Augmented Analytics engine to help users identify patterns and relationships that may be overlooked as well as underlying causes of trends and patterns, including from unstructured text data.
- Multi-Dimensional Visualization: RATH's data visualization capabilities allow users to create custom interactive and dynamic charts, graphs, and dashboards that clearly communicate complex data-driven insights.

"RATH and its Copilot feature are game-changers in the data analysis space, plain and simple," said Jason Wu, Developer at Kanaries Data. "The easy-to-use tool does more than just make data analysis more efficient and effective; it allows users to uncover insights oftentimes previously overlooked, making data-informed decisionmaking easier than ever."
