Flower Turbines was founded to make small wind turbines a global industry, particularly in

locations close to people and buildings. Since its start, Flower Turbines has been working towards building a company that could be one of the pillars of renewable energy. Flower Turbines is a US company with an important branch in the EU that has the goal of making small wind as powerful a force in renewable energy as solar by using its multiple patents to create a wind turbine that meets all the needs of urban and suburban environments. It combines aerodynamic innovations with beautiful design, low noise, and bird friendliness. Unlike other turbines, they make each other perform better when tightly packed together.

Newchip is an online accelerator with courses on fundraising and company building, provides a network of experienced mentors for advice, and makes introductions to investors.

Flower Turbines is raising funds through equity crowdfunding Regulation A at <https://www.startengine.com/offering/flowerturbines>. This is its fourth raise on Startengine and two of the previous raises were sold out.
