Increase in prevalence of cancer, growth in global geriatric population , rise in demand for minimally invasive diagnostic procedures, and surge in introduction of technologically advanced capsules drive the market growth However, high cost of treatments and endoscopy equipment, limited reimbursement, and risk of retention of the capsule, which may require endoscopic retrieval or rarely surgical resection hinder the capsule endoscopy system market growth. Conversely, continuous product innovations and introduction of capsule endoscopy in untapped countries are expected to provide lucrative growth opportunities for key market players.
