Blueprint and Acuvate Partner to Migrate Companies' RPA Estates to Microsoft Power Automate and Lower Automation Costs

Organizations can now accelerate and simplify their RPA migrations to reduce costs and promote scale with Microsoft

Blueprint and Acuvate Partner to Migrate Companies' RPA Estates to Microsoft Power Automate.

TORONTO, ON, CANADA, March 29, 2023 /EINPresswire.com/ -- Blueprint Software Systems and Acuvate today announced their strategic partnership to help organizations migrate their automation estates from expensive and complex legacy RPA platforms onto Microsoft Power Automate quickly, cost-effectively, and securely.

Blueprint and Acuvate's partnership will enable organizations to leverage the significant reduction in licensing, infrastructure, and development costs that Microsoft Power Automate delivers, in addition to unlocking scale so RPA programs can apply automation across the breadth of their companies for higher returns.

"We're thrilled to partner with such an innovative global service provider that has a proven track record in helping organizations digitally transform their businesses," explains Blueprint CEO and President, Dan Shimmerman. "Acuvate's extensive insight and experience in the Microsoft ecosystem is a powerful asset and we're ready to hit the ground running to get organizations over to Microsoft Power Automate to reduce their RPA total cost of ownership and exponentially improve their entire automation practice."

Blueprint is a preferred RPA Migration Technology partner for Microsoft's global RPA migration program. Blueprint's RPA Migration solution ingests an organization's automation estate from their legacy RPA platform and automatically converts those automated processes so they're compatible with Microsoft Power Automate, with very minimal human intervention needed. Upon ingestion, Blueprint also provides powerful analytics and insights into an organization's RPA estate such as the compatibility between their current RPA estate and Power Automate, the complexity and effort required to be fully operational in Microsoft Power Automate, and where processes can be optimized and simplified to reduce maintenance overhead in the future.

"Partnering with Blueprint enables us to provide our customers with a comprehensive solution

that accelerates the migration process, allowing them to focus on their core business operations," said Abhishek Shanbhag, VP, AI & Automation, Acuvate. "We are excited to work with Blueprint to enable organizations to achieve their automation goals faster and more efficiently."

With three Microsoft Advanced Specializations and a 2022 Microsoft Partner of the Year finalist, Acuvate is a premier global software service provider for any organization looking to leverage the Microsoft Power Platform and migrate their automation estate to Power Automate to reduce RPA's total cost of ownership while enabling scale. With Blueprint and Acuvate's recent partnership, organizations can now migrate to Microsoft Power Automate strategically and effortlessly to significantly increase the returns and quality of their automation practice.

About Blueprint

Blueprint Software Systems is a global software company that helps organizations assess and improve their process automation practice, increasing the value their automations deliver while reducing operating costs. Blueprint's platform ingests entire automation portfolios and delivers invaluable insight and analytics into those estates, indicating where there are redundancies, overly complex automations, and re-platforming opportunities to migrate entire digital workforces to new generation intelligent automation platforms at a fraction of the cost and quicker than any other option available.
