

DevSecOps Implementation Strategies Discussed on The Virtual CISO Podcast from Pivot Point Security

DevSecOps integrates security processes and tools into a modern software development process for on-time, on-budget code that is also demonstrably secure.

HAMILTON, NJ, UNITED STATES, March 28, 2023 /EINPresswire.com/ -- With the rise of the cloud

For a cogent and compelling introduction to DevSecOps for business and security leaders, tune into this podcast with André Kearthland from Netsurit.”

John Verry, CISO & Managing Partner

has come DevOps, a way to build and deploy applications faster and with higher quality. Enter DevSecOps, which integrates application security processes and tools into a modern software development process for on-time and on-budget code with the promised features that is also demonstrably secure.

Most corporate leaders know that security is important and that web application vulnerabilities can introduce serious business risk. But like eating right and exercising more, knowing what’s good doesn’t always equal doing

what’s good. With DevSecOps, you can effectively integrate security into your software development lifecycle without introducing “speed bumps” to delivery schedules and rich functionality.

To share best practices for starting a successful DevSecOps program, the latest episode of The Virtual CISO Podcast features André Kearthland from Netsurit. Hosting the show is John Verry, Pivot Point Security’s CISO and Managing Partner.

Topics discussed include:

- What is DevSecOps and how does it differ from DevOps?
- Getting business stakeholder buy-in for application security
- The best way to get started with DevSecOps
- Who in your org needs application security training and why
- How to assess application risk and why it’s so important

For a cogent and compelling introduction to DevSecOps for business and security leaders, tune

into this podcast with André Kearthland from Netsurit.
