

Blocktrade 2.3 Update: A New Era in Crypto Investing

Discover Blocktrade 2.3: Apple & Google Pay, recurring investments, and an enhanced user experience, transforming the crypto journey.

LUXEMBOURG, LUXEMBOURG, March 29, 2023 /EINPresswire.com/ -- [Blocktrade](#) 2.3 Update Introduces Recurring Investment Plan, Seamless Payment Methods, and Enhanced User Experience

Blocktrade is excited to announce the release of Blocktrade 2.3, the latest in a series of significant upgrades to the platform. As part of this update, users can now enjoy the convenience and security of Apple Pay and Google Pay as payment methods, as well as the introduction of a recurring investment plan, and an enhanced user experience.

Since the release of Blocktrade 2.0 in October 2022, the platform has continually evolved, offering zero trading fees, credit/debit card support, new tokens, live chat support, and new assets in the NFT, Metaverse, and Web3 categories. Blocktrade 2.3 marks another major milestone for the company and its customers, demonstrating a commitment to improving the user experience while adapting to market changes and emerging technologies.

Apple Pay and Google Pay Integration

The integration of Apple Pay and Google Pay exemplifies Blocktrade's dedication to providing its users with seamless and secure payment options. These newly added payment methods not only offer an effortless and efficient experience but also safeguard users' financial information with advanced fraud protection systems. For instance, Blocktrade enables users to conveniently [buy XRP using Apple Pay](#). By incorporating these widely-used mobile payment options, Blocktrade broadens its accessibility and accommodates the varied preferences of its expanding user base. Furthermore, Blocktrade supports the purchase of over 40 cryptocurrencies using different payment methods. For example, to explore the various payment options for buying

Ripple, visit the '[Buy XRP](#)' page on the Blocktrade website.

Recurring Investment Plan

In response to the current bearish market conditions affecting both traditional and crypto markets, Blocktrade has introduced a recurring investment plan. This plan allows users to automatically invest in their preferred cryptocurrencies on a daily, weekly, or monthly basis, utilizing the dollar-cost averaging (DCA) strategy. By consistently investing a fixed amount regardless of market conditions, users can lower the average cost of their investments and manage risk more effectively.

DCA is a simple, accessible strategy suitable for investors of all levels and budgets. It is particularly useful for those seeking to avoid the emotional pitfalls of buying high and selling low, and for those aiming for long-term growth. However, it's important to remember that while it can help reduce the impact of volatility, it cannot guarantee profit. The strategy may not be suitable for those with higher risk tolerance or those who seek to maximize returns in upward trending markets.

Enhanced User Experience

Alongside the introduction of Apple Pay, Google Pay, and the recurring investment plan, Blocktrade 2.3 brings an improved user experience. With an updated user interface, streamlined navigation, and intuitive tools for managing investments, the platform now offers an even more user-friendly environment for both beginners and experienced investors.

Blocktrade is thrilled to offer these new features and payment methods, making it easier than ever for users to start their investment journey. The addition of Apple Pay, Google Pay, the recurring investment plan, and the enhanced user experience reaffirms the company's dedication to providing innovative and user-friendly solutions for its customers.
