

From Farm to Table: Tracing the Booming Market for Buttock Augmentation

Young population and increase in social media influence are the major driving factors of the global buttock augmentation market.

PORTLAND, OREGON, UNITED STATES, March 29, 2023 /EINPresswire.com/ -- Buttock Augmentation

Buttock augmentation is a cosmetic procedure that involves the use of surgical or non-surgical methods to enhance the size and shape of the buttocks.

It's important to note that buttock augmentation procedures carry risks and potential complications, including infection, scarring, and dissatisfaction with the results. It's important to discuss the risks and benefits of these procedures with a qualified and experienced plastic surgeon before making a decision.

Buttock Augmentation is commonly used as a dietary supplement and is available in various forms, including capsules, powders, and liquids. It is also used as an ingredient in various food and beverage products, such as infant formulas, nutritional supplements, and functional foods.

It is important to note that while Buttock Augmentation has shown promising health benefits in studies, more research is needed to fully understand its potential uses and effects in humans. Additionally, those with dairy allergies or sensitivities should exercise caution when consuming products containing Buttock Augmentation.

The global buttock augmentation market was valued at \$1,829.08 million in 2020, and is

projected to reach \$11,206 million by 2030, registering a CAGR of 21.2% from 2021 to 2030.

Global buttock augmentation market (178 countries, 2021-2030, CAGR 21.2%) @ https://www.alliedmarketresearch.com/buttocks-augmentation-market/purchase-options?utm_source=AMR&utm_medium=research&utm_campaign=ML

COVID-19 has had a short-term impact on the buttock augmentation market, mainly during the early stages of the pandemic as the whole world implemented lockdowns and other travel restrictions to limit the spread of COVID-19. Due to restrictions and lockdowns, ongoing and scheduled surgeries have been delayed or cancelled, which has negatively impacted the butt lift market. However, interest and demand for beauty procedures have increased during COVID-19 among US women, including buttock augmentation.

The global buttock augmentation market is segmented on the basis of product, end user, and region. Depending on product, the market is fragmented into buttock implants, buttock injections, and others. The buttock injections segment is further subdivided into Hydrogel Butt Injections, PMMA Butt Injections, Poly-L-lactic acid and Silicone Butt Injections.
