Infertility treatment is the process of treating male and female infertility. Infertility is a disease of the male or female reproductive system defined by the failure to achieve pregnancy after 12 months or more of regular, unprotected sexual intercourse. Infertility is a condition in which a woman is unable to conceive after a year of trying. Endometriosis, uterine fibroids, and thyroid issues are just a few examples of female infertility causes. Men who are having fertility issues may have low testosterone or sperm counts.
