

Plastic Antioxidants Market is expected to reach USD 4,962.2 million by 2026

The global plastic antioxidants market is projected to reach \$4,962.2 million by 2026, growing at a CAGR of 6.4% from 2019 to 2026

OREGON, PORTLAND, UNITED STATES, March 30, 2023 /EINPresswire.com/ -- Allied Market Research recently published a report, titled, "[Plastic Antioxidants Market](#)" by Type (Phenols, Amines, Phosphites, Organic Sulfides, Antioxidant Blends, and Others), Form (Liquid and Solid), and Polymer Resin (Polyethylene, Polypropylene, Polyvinyl Chloride, Polystyrene, Acrylonitrile

Plastic Antioxidants Market Size

Butadiene Styrene (ABS), and Others): Global Opportunity Analysis and Industry Forecast, 2019–2026". The global plastic antioxidants industry was pegged at \$3.02 billion in 2018 and is expected to reach \$4.96 billion by 2026, registering a CAGR of 6.4% from 2019 to 2026.

Major motivators for market growth

Protection provided by antioxidants against thermal and oxidative degradation and promising plastic consumption have boosted the growth of the global plastic antioxidants market. However, the implementation of stringent regulatory policies hampers the market growth. On the contrary, expansion in use of agriculture plastic is expected to create lucrative opportunities in the near future.

Major market players

SI Group

Clariant AG

BASF SE

Sumitomo Chemical Co. Ltd

Dover Chemical Corporation

Everspring Chemical Co. Ltd

Amfine Chemical Corporation

3v Sigma USA Inc

Songwon

Solvay S.A

Phenols segment dominated the market

Based on type, the phenols segment held the largest share in 2018, contributing to nearly two-fifths of the global plastic antioxidants market, owing to rise in the adoption of high-performance plastic. However, the phosphites segment is expected to register the fastest CAGR of 7.1% during the forecast period. As phosphites function as an extender that enhances the life cycle of the final products, which increases the growth of the segment.

Polymer resin segment to manifest fastest CAGR through 2026

Based on polymer resin, the polypropylene segment is projected to portray the fastest CAGR of 7.1% through 2026, owing to rise in demands across the range of industries. However, the polyethylene segment held the largest share in 2018, accounting for nearly one-third of the global plastic antioxidants industry, due to rise in demands of polyethylene in the packaging industry.

North America to manifest the fastest CAGR

The market across North America is expected to manifest the fastest CAGR of 7.3% during the forecast period, owing to rise the increase in the adoption of plastic material for packaging used in various industries. On the other hand, the Asia-Pacific the market dominated in 2018, contributing to around half of the total revenue, owing to the presence of a huge consumer base i.e. established automotive and electronic & electrical industries, and stable growth in the

construction industry.□
